

EMWS-218

Wall Mount Box Speaker

Product Description

The Emix EMWS-218B is a very versatile 2-way 3-driver modular speaker that delivers outstanding audio quality and performance, flexible installation, and aesthetic value at the same time. Its curved and modular ID-friendly design enables it to be used by itself, or, as a cluster of 2, 3 or 4 speakers. The individual cabinets itself are designed to fit both vertically and horizontally at wall-to-wall or ceiling-to-wall inner corners. It is available in black or white to fit well into most interior design concepts.

The EMWS-218 has various commercial application possibilities. It can be used in public address systems and also low impedance distributed sound reinforcement systems. The EMWS-218B is suitable for F&B outlets, retail outlets, lounges, lobbies, conference rooms, community centers and any common spaces for paging and background music purposes that require high quality audio output and SPL.
