

# EMWT-380

## Sound Projector Speaker

Sound projector is intended for applications, where directing the sound beam is desirable. Similar in concept to a spotlight, a sound projector can be used to provide localized sound reproduction. The **EMIX** EMWT 380 is a powerful 10W sound projector intended for high quality speech and background music reproduction in a wider range for indoor and outdoor applications. The mounting bracket is provided with the sound projector.
