

EMIX Receptacle Panel

EMIX has introduced its latest range of receptacle panels for 1/4" (unbalanced), Speaker Socket, XLR (F), VGA & RCA, and RCA & VAA. Built of high quality materials and standards and designed for common compatibility, these EMIX receptacles are the best choice for your installations. They ensure the long-term integrity of your installations.

Among the features of these receptacles are

- > Stylish, durable, white colour Acrylic/PVC alloy body and face panel ensures long term strength and durability while providing performance, appearance and cost effectiveness.
- > Built with high quality standards with connectors from Japan, Taiwan and Neutrik
- > Easily matched with "CLIPSAL", "MK", "PDL" 3-pin power wall socket panels.
- > One Gang British standard mounting panel size for common compatibility and matching.
